4 Table/ Figures

Tables and figures are numbered continuously, maybe within each chapter in decimal classification. In addition to the numbering, a title with a clear description of the contents is needed:

Table 1: Number of observations in each census

5 Quotes

Literal passages (quotes) should start and end with quotation marks. Quotes have to be copied true to the original version. Possible deviations have to be clearly marked: omissions are to be marked with three dots (...); personal additions to the quote have to be put in brackets (); a quote within a quote has to be marked with an apostrophe in the beginning and the end.

Set a short reference like this [Author Year, page] behind the Quotation and add this in the bibliography. This is the official APA – Standard.

6 Example: Table of figures

Figure 1: something.....9
 Figure 2: the other one....10
